PROFESSIONAL SUMMARY

Final-year B.Tech Artificial Intelligence and Data Science student with hands-on project experience in Python, SQL, Power BI and data science. Built analytical dashboards, cleaned and visualized real-world datasets, and applied foundational machine learning techniques through academic and personal projects. Completed a Power BI internship and seeking Data Analyst or Data Science fresher roles.

TECHNICAL SKILLS

Programming: Python, Object-Oriented Programming (OOP)

Data Analytics: Data Cleaning, Data Preprocessing, Exploratory Data Analysis (EDA), Statistics, Data Analysis

Visualization & BI: Power BI, DAX, Power Query, Excel, Data Visualization, KPI Development, Matplotlib, Seaborn

Database: SQL, PostgreSQL

Data Science / ML: Pandas, NumPy, Scikit-learn, Regression, Classification, Clustering, Model Evaluation

Tools: Jupyter Notebook, VS Code, Git, GitHub

EXPERIENCE

Power BI Intern | **Cognifyz IT Solutions** Remote | Aug 2026 – Sep 2026

- Developed interactive Power BI dashboards using structured datasets.
- Performed data transformation and preparation for analytical reporting.
- Created KPI-driven visualizations and dashboard navigation.
- Completed assigned Power BI internship tasks and delivered business-oriented reports.

SELECTED PROJECTS

Google Pay Expense Sharing System | **Python, OOP, Greedy Algorithm, Jupyter Notebook**

- Built an object-oriented Python application inspired by Google Pay split expenses to log shared trip costs, validate payer names and amounts, and compute each person's equal share and net balance.
- Implemented a two-pointer greedy settlement algorithm to minimize payments, settling a ₹4,805 three-person trip in just 2 transactions.

HR Analytics Dashboard | **Power BI, DAX, Power Query, Excel**

- Developed a multi-page interactive Power BI dashboard analyzing headcount, attrition, performance and salary trends for a 1,000-employee dataset.
- Prepared data with Power Query and built DAX measures for KPIs such as active headcount, attrition rate and average salary.

Python Sales Data Analyzer | **Python, Pandas, NumPy, Matplotlib**

- Built a Python pipeline to clean sales data (duplicates, nulls, invalid values) and compute 10 business KPIs including revenue, order value and top products.
- Generated visualizations of monthly trends and sales by category, city, product and payment mode to support business insights.

EDUCATION

B.Tech – Artificial Intelligence and Data Science Final Year

Dhanalakshmi Srinivasan Engineering College, Perambalur, Tamil Nadu

COURSE / CERTIFICATION

HCL GUVI – Data Science Currently pursuing
